

AI Product Manager and **IIM** alumnus with **6+ years'** experience (4+ in PM) building **0→1 GenAI** and SaaS products across Enterprise AI, Data Infrastructure, Insurance (fraud detection), and EdTech. Shipped **4+ products** — MVPs live in under 3 months and two PoCs converted into signed development contracts — leading **cross-functional teams** of **20+** and managing senior stakeholders up to **CEO** and **founder** level. An AI-native builder specialized in **RAG** systems, **AI agents**, **Voice agents**, and AI chatbots on cost-efficient LLM architectures — who personally builds production modules with **Claude Code** and **Codex** rather than managing AI as a bolt-on.

Experience

AI Product Manager

smartSense Consulting Solutions Pvt Ltd

Apr 2022 - Present

Insight 360 - AI Agents and RAG ENTERPRISE SOLUTION

- Launched enterprise RAG platform in 3 months, scaling to **100+ DAU** during early adoption
- Built **AI agent-based** architecture for intent-driven external data retrieval, unlocking new use cases and driving **onboarding of 5+ enterprise clients**
- Designed **Multimodal** customisable **document intelligence pipeline** (OCR + layout parsing + embeddings + retrieval) enabling multi-format knowledge access
- Reduced **manual document** effort by **~90%** by **improving** enterprise knowledge retrieval workflows
- Ran a live A/B test of hybrid retrieval (semantic + keyword)** against a **semantic-only** baseline, **lifting answer-acceptance by ~70%**, then **shipped hybrid** as the **default retriever**
- Optimized architecture using **open-source Models & LLMs**, reducing dependency on paid APIs and improving cost efficiency
- Led a **20-member** cross-functional team across engineering, design, and QA through **Agile/Scrum** sprints user stories to ship MVP under tight timelines.
- Crafted **product narrative** and **investment pitch**, securing internal **funding** and enabling enterprise sales
- Earned **recognition** in internal & client evaluations as a **leading open-source**, RAG-enabled solution.

Ostrich AI — Decentralized AI infra + hackathon-driven AI/ML model innovation

- Architected** and **launched decentralized** AI infrastructure platform, integrating **blockchain-based data security** with distributed **compute nodes**, enabling secure **AI/ML models** deployment while reducing infrastructure **costs by up to 70%** vs. traditional cloud providers like **AWS or Azure**
- Owned** end-to-end **product vision, strategy**, roadmap, taking product from problem definition → **MVP**
- Translated ambiguous enterprise use cases into a scalable AI-driven product, aligning **business goals** with technical architecture
- Led 12+ member** cross-functional team including Product Managers, engineers, designers, and QA to **deliver MVP** under **aggressive timelines**
- Enabled early **enterprise adoption**, onboarding **ICICI Bank & Abu Dhabi Bank** during **MVP phase** for **Pilot**
- Built the **hackathon creation** flow and an AI-powered evaluation framework that automatically scored and ranked AI/ML model submissions, replacing subjective manual judging with consistent, scalable evals.
- Designed **end-to-end** user journeys, **wireframes**, **AGILE Sprints** and prioritization frameworks, aligning stakeholders and accelerating product execution

Second Brain AI — Insurance Fraud Detection & Claims Platform (0→1, ongoing)

- Driving **0→1 development** of **AI-powered** fraud detection platform, leveraging **RAG AI, Machine Learning**, and **Knowledge Graphs** to identify anomalies in **insurance claims**
- Building **document intelligence** system for insurance claims, enabling **automated** processing at scale and targeting **~90% reduction** in manual intervention
- Developing plug-and-play **AI chatbot** solution to handle employee policy and **claims queries**, with seamless **integration** into enterprise ecosystems via **SDKs** and platforms like **MS Teams** and **Slack**
- Leveraging **AI-assisted development (Claude Code)** to **independently build** core product modules, accelerating MVP timelines and **reducing engineering dependency**
- Executing **GTM strategy** via **LinkedIn-led outreach**, building early B2B pipeline, and developing an **AI-driven prospecting agent** to automate ICP targeting and engagement
- Shaping** product **positioning** and use-case strategy through **competitive analysis** of insurance fraud detection solutions

FOSTER - 0→1 EdTech campus networking & hiring platform

- Contributed** to building a **multi-sided networking** platform connecting colleges, students, and employers across India
- Drove product direction** and execution, supporting onboarding of **10,000+ colleges** and **100+ employers** within the first year
- Defined **market entry strategy, feature prioritization**, and release roadmap to drive B2B platform adoption
- Leveraged **user insights**, Users **feedback** and performance data to continuously refine **product strategy**, features and improve engagement
- Collaborated** with **leadership** on **pricing strategy** and long-term roadmap, **influencing revenue and retention**

AI Automation & PoCs

- Led two **PoCs** that **each** converted into a **signed development contract**: a **multi-agent voice agent** for sports club in **New Zealand**, and a **multi-agent orchestrator** workspace-booking **chatbot** for **Upflex**.
- Accelerate **PRDs, user stories**, and **rapid prototyping** daily using **Claude (Skills, Subagents)** , **ChatGPT**, **Claude Design**, **Lovable** and **Figma Make**.
- Independently build **AI web apps, AI agents**, and **React (FE) + Python (BE) modules** with **Claude Code & Codex** — idea to working product, minimal engineering dependency.
- Built **AI-driven CRM automation** pipeline (**n8n + GPT**), **reducing** manual effort **by ~40% and** improving lead management efficiency
- Developed **LLM-based lead generation** system to identify and qualify **prospects**, enhancing **lead discovery** efficiency

Engineer

Green Power International

Jan 2017 - Feb 2019

- Assisted in **end-to-end project management** for **572 km railway electrification**, including **site execution** and **vendor coordination**.
- Supported **procurement**, ERP-based planning, and **manpower** management, ensuring timely project delivery.
- Worked directly with **senior leadership** on planning and billing activities, gaining **early exposure** to structured **project management** in EPC projects.

Education

IIM Nagpur
MBA | 2020 - 2022

Krishna Institute of Engineering and Technology
B.Tech | Electronics and Instrumentation | 2012 - 2016

Skills

- Product Skills-** Product Vision & Strategy ,Product Roadmapping, Sprint planning and Execution, Agile, Feature Prioritization, Customer Discovery & Validation, AGILE, Prototyping tools [FIGMA, Miro, Powerpoint], AI Prototyping - FIGMA Make, Project Management, JIRA, KPIs, Azure DevOps, Software development Lifecycle (SDLC), Web Applications, Excel , PowerPoint, Prompt Engineering.
- AI Skills** - Gen AI, Agentic AI, LLMs, Voice agents (TTS and STT), RAG, Machine Learning, AI Coding Claude Code, Codex, NLP, Prompt - (Evaluation, Writing).
- Tech Skills** - HTML, CSS, JavaScript, React, Python, SQL, System Design, APIs, Databases, Tableau, Data Analytics, Google Ads and Analytics, Keywords research, Wordpress, Market Research, Azure AI Microsoft Foundry.
- Soft Skills** - Team Management, Leadership, Stakeholder Management, Decision Making, Cross-functional Leadership, Strategic Thinking, Client Management, Execution under tight timelines.

Certifications

Masters Union - Product Management | KPMG – Lean Six Sigma Green Belt | ISCEA - Certified Supply Chain Analyst | SQL Fundamentals - MySQL
